Environment Policy Statement

Britannia Marine is fully aware of its duty to protect and, where possible, enhance the environment. We are totally committed to reducing or eliminating any negative impacts our actions may have and to avoiding pollution.

We will endeavour to identify potential environmental impact at the earliest possible stage in every project we undertake, and plan accordingly.

We will also continuously review and modify our practices to help us achieve optimum environmental performance.

As well as direct effects on the environment arising from our operations, we recognise that we can influence procedures and policies through client/partner education.

We will comply with all applicable local, national and international environmental legislation and regulations and work to integrate environmental considerations into our business decisions, adopting greener alternatives wherever possible.

All employees are responsible for working towards the objectives contained within this policy.

Kamel Baizid
Founder & Chairman
Sep 2010

We aspire to:

- *Comply with all relevant legal requirements, codes of practice and regulations.*
- *Integrate environmental and sustainability considerations and positive impacts into all business practices.*
- *Prevent pollution to land, air and water.*
- *Reduce water and energy use.*
- *Minimise waste and increase recycling within the framework of our waste management procedures.*
- *Identify and manage environmental risks and hazards.*
- *Involve customers, partners, clients, suppliers and subcontractors in the implementation of our objectives.*
- *Respect our client's environmental management policies, practices and systems.*
- *Encourage clients to adopt solutions with high environmental performance in line with our own standards.*
- *Encourage our suppliers and those we employ to maintain high levels of environmental performance in the context of supplies we receive / work which they undertake for us.*
- *Promote environmentally responsible purchasing*
- *Provide suitable training to enable employees to deal with their specific areas of environmental control.*
- *Improve the environmental efficiency of our transport and travel.*
- *Establish targets to measure the continuous improvement in our environmental performance.*
